**Surfware to Introduce the Latest Release in the
SURFCAM Velocity® Series at SolidWorks World 2007**

Westlake Village, CA – Surfware Inc., developer of SURFCAM CAD/CAM Systems, will be introducing the latest release in the SURFCAM Velocity Series, version 3.0, at SolidWorks World 2007.

In the Certified Partner Product Theater, Steve Meyers, Sales Engineer from Surfware, Inc., will present how SURFCAM's patent-pending TrueMill® toolpath engine, combined with the company's significantly enhanced multi-surface 5-Axis milling capabilities, gives SURFCAM customers an unfair advantage. For users who machine SolidWorks parts, Steve will show how these advantages are boosted because of SURFCAM Velocity's impressive interoperability with SolidWorks models. The presentation will also cover major enhancements in user productivity, such as a new machining knowledge database, improved toolpath control, and an expanded SURFCAM Application Programming Interface (API).

"I'm going to show how our customers can leverage SURFCAM's interoperability with SolidWorks to manufacture parts *Better, Faster, and Cheaper* than their competitors," said Steve Meyers.

The presentation will be held at the Certified Partner Product Theater on Monday, February 5th at 6:00 PM. Surfware will be exhibiting throughout the show at booth # 333, February 4 – February 7, 2007 at Morial Convention Center in New Orleans, Louisiana. About Surfware, Inc.

Surfware, Inc., the developer of SURFCAM® CAD/CAM systems, and its new patent-pending technology TrueMill™ has truly revolutionized milling, provides solutions to today's biggest design and manufacturing concerns. SURFCAM Truemill, designed for CNC programming of 2- through 5-axis mills and lathes, is the only toolpath generator that intelligently and dynamically controls the tool's engagement angle with the material such that it is never exceeded. Surfware's global user base includes many leading manufacturers in the aerospace, defense, automotive, consumer electronics, industrial equipment and medical products industries. About SolidWorks Corporation

SolidWorks Corporation, a Dassault Systèmes S.A. (Nasdaq: DASTY, Euronext Paris: #13065, DSY.PA) company, develops and markets software for mechanical design, analysis, and product data management. It is the #1 supplier of 3D mechanical design software for the mainstream market. SolidWorks is the mainstream 3D CAD market's leader in number of users in production, customer satisfaction, and revenue. For the latest news, information, or a live online demonstration, visit the company's Web site (www.solidworks.com) or call 1-800-693-9000 (outside of North America, call +1-978-371-5000).
